1. **Search** for ochre sea stars (*Pisaster ochraceus*) in the defined plot. Don't forget to look under crevices and in cracks.
2. **Measure** (in centimeters) from the central disk to the end of the longest arm.
3. Indicate the **color** of the ochre star, purple/brown or orange.
4. If any **sign of disease** (see LiMPETS Star Guide), tell your scientist or teacher.
5. Ask your scientist or teacher to take a **photo** of every sea star you find.
