

LiMPETS Rocky Intertidal Monitoring Dates 2017/2018

Please use this as a general guide for what dates/times are available for Rocky Intertidal monitoring trips.

Monitoring will be scheduled in **2-3 hour time blocks** (e.g monitoring ~1 hour before low tide to ~1 hour after the low tide). In order to get all data collection completed, please plan to be on the reef the entire time you are scheduled.

Note: Low tides and times below are for Half Moon Bay, CA. Low tide times/program times will need to be adjusted for our Northern and Southern sites.
